Shaping the Digital Future Together

The upcoming India-European Union Free Trade Agreement marks a historic turning point for global technology supply chains and digital cooperation. As businesses seek to diversify hardware dependencies, secure software talent, and co-innovate in emerging technologies, the bilateral corridor between India and Europe becomes highly strategic.

The EU-India Technology Forum 2026 provides a high-level platform for technology pioneers, enterprise leaders, and policy shapers to turn this landmark agreement into actionable growth, joint ventures, and resilient digital infrastructures.

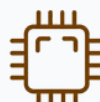

Thematic Focus

Intelligent Systems & AI

- Industrial Automation & Applied AI
- Cross-border data engineering
- Scaling AI software solutions

Hardware & Semiconductors

- Next-gen chip architecture
- Securing supply chain resilience
- Joint hardware manufacturing

Cloud & Connectivity

- 6G & infrastructure co-development
- Scalable cloud architectures
- International data compliance

Why Your Organization Needs to Be Present

- **Direct Network Access:** Connect with C-level executives, tech architects, and strategic decision-makers from both leading Indian IT powerhouses and European industrial leaders.
- **Strategic Positioning:** Align your corporate roadmap early with the new legal and economic incentives created by the EU-India Free Trade Agreement.
- **Future-Proof Supply Chains:** Discover highly capable, alternative partners in hardware design, semiconductor strategies, and advanced software engineering to mitigate global geopolitical risks.
- **Collaborative R&D:** Identify concrete opportunities for cross-border research, technical piloting, and collaborative innovation in 6G and AI frameworks.
